GOLDEN 高顿

E

Corporation tax liabilities

GOLDEN 高顿

E1 + E2(a)~(c) + E2(h)~(j)
Computing taxable total profit

Lecture example 2 - Solution

Year ended 31 March 2026	AIA £	FYA £	SRP £	MP £	Allowance claimed £
TWDV b/f			0	0	
+Addition					
Second-hand MP asset	260,000				
-AIA	(260,000)				260,000
	0				
New SRP asset	510,000				
-AIA	(510,000)				510,000
	0				

Lecture example 2 - Solution

Year ended 31 March 2026	AIA £	FYA £	SRP £	MP £	Allowance claimed £
New MP asset	680,000				
-AIA max.=1,000,000-260,000-510,000 = 230,000	(230,000)				230,000
Balance of new MP	0	450,000			
100% FYA (full expensing)		(450,000)			450,000
TWDV c/f		0	0	0	
Capital allowance					1,450,000

Lecture example 3 - Solution

Year ended 31 March 2026	SRP £	MP £	Allowances claimed £
TWDV b/f	28,200	0	
-Disposal			
BC on 130% super deduction			(42,600)
BC on proceeds relating to 50% FYA 72,000*50%			(36,000)
Balance of proceeds relating to 50% FYA 72,000-36,000	(36,000)	__	
	(7,800)	0	
-BC	7,800	__	(7,800)
TWDV c/f	0	0	
Overall balancing charge			(86,400)

Lecture example 4 - Solution

Year ended 31 March 2026	SRP £	MP £	Allowances claimed £
TWDV b/f	425,000	0	
-Disposal			
BC on proceeds relating to 50% FYA $350{,}000 * \frac{400{,}000}{1{,}400{,}000} * 50\%$			(50,000)
Balance of proceeds relating to 50% FYA 350,000 – 50,000	(300,00)	—	
	125,000	0	
-WDA			
6%	(7,500)	—	7,500
TWDV c/f	117,500	0	
Overall balancing charge			(42,500)

Lecture example 5 - Solution

Trading profit	£
Interest payable 2,500+18,650 — 6,600	(14,550)
Investment income:	
Interest payable	(7,900)
Interest receivable 4,400+8,650+3,500	16,550

Lecture example 6 - Solution

	12 months to 2025.8.31 £	4 months to 2025.12.31 £
Adjusted trading profit (12:4)	2,160,000	720,000
Property income(accruals)	24,000	8,000
Chargeable gain	36,000	0
Total profits	2,220,000	728,000
Less QCD	0	(58,000)
Taxable total profits	2,220,000	670,000
