A4~A6
Self-assessment and payment of tax by companies

Lecture example 1 - Solution

Augmented profit=£480,000+£40,000=£520,000

Profit threshold=£1,500,000/3= £500,000

£520,000 > £500,000

So Quack Ltd is a large company.

Lecture example 2 - Solution

Each instalment = £4m × $\frac{3}{10}$ = £1.2m
